INNOVATIVE  
HIGH-QUALITY  
**CANCER CARE**  
THROUGH  
COORDINATING  
**RESEARCH AND**  
**EDUCATION**

### Welcome to OECI Oncology Days 2018

The annual convention of the Directors of the European Cancer Centres and Institutes is being hosted in Poland for the first time. This year is a major milestone event for the OECI as it is the celebration of the OECI's 40<sup>th</sup> Anniversary since the very first meeting of the Directors of some of the main European Cancer Centres back in 1979.

First of all, I would like to thank the Greater Poland Cancer Centre for the kind and generous support given to our main Annual Event.

2018 is the transitional year of my presidential mandate and Professor Thierry Philip will be taking over the Chair of OECI, with the intention of carrying forward the running activities and leading our Organisation towards new challenges and achievements, promoting multidisciplinary, integration and quality in the organisation of our cancer centres.

The OECI mission has always been to encourage and stimulate the European cancer community to work in partnership, reducing disparities, providing the best available cancer treatments and survivorship plans, for all European cancer patients in the context of sustainable health care systems. In this aim, the OECI jointly elaborates quality standards and also supports innovative approaches.

The 2018 OECI Scientific Conference will debate on which emerging technologies in therapies against cancer should be selected and adopted by cancer centres, taking into consideration the potential cost benefits

Thanks to the dedicated and assiduous support of the OECI Offices and the Board Members, during the four years of my Presidency, OECI has developed a more solid and federated organisational structure. This has given us the possibility to better reach our goals through inclusivity, and to involve more members to interact and establish partnerships with other like-minded organizations, which share a common vision. An open and transparent interaction amongst all the main cancer actors is a mandatory pre-condition, justifying our efforts and confirming that we are committed to serve our patients and the progress of science.

A cancer centre is the central place where multi-disciplinarity is implemented and the OECI cancer centres represent the advanced front of innovation, the place where research and applications are studied and approaches of care are compared, with a view to offering patients the best options for therapy and well-being.

Unfortunately, our health systems today are struggling under the burden of cost of innovation. In order to avoid the inception of parallel "patient selective" health systems, we must not be diverted into our health policy decisions by reasons that do not directly reflect achievable and sustainable results.

The annual meeting represents an ideal setting for holding a productive exchange of views and I invite you to make the most of this meeting and the relaxed and confidential atmosphere of the social events we have organised for our participants to discuss common strategies.

Again this year, we decided to leave space in our programme for all our Working Groups to also meet, in addition to the Directors of our centres/institutes, and other stakeholders working in different sectors, giving them the opportunity to draw upon results already obtained or to pursue further collaboration for the achievements of their goals.

The increase in survivorship has also reinforced the issue of patient rights to access a dignified and active life in society, during and post illness, on top of the best options for cure and therapeutic solutions. After my presidency, I will continue to Chair the WG on Collaboration for Good Practices with Patients and I will have more time to dedicate to the actions we are currently developing in order to strengthen our relationship with patients, demonstrating how they are at the centre of all our efforts.

It has been a great honour to serve as your President for the last four years. The OECI is a unique and essential organisation for the development and recognition of all the hard work done by all the professionals in our cancer centres.

I wish you a pleasant stay in Poznan and very constructive interactions during these OECI 2018 Oncology Days!

*Dominique de Valeriola*  
OECI President

# OECI2018 ONCOLOGY DAYS

## Greater Poland Cancer Centre Director's welcome

### THE 40<sup>TH</sup> OECI ANNIVERSARY: WELCOME TO POZNAN

The year 2018 marks the 40<sup>th</sup> anniversary of the founding of the Organisation of European Cancer Institutes (OECI). The OECI 40<sup>th</sup> Anniversary meeting will be held at the Greater Poland Cancer Centre (GPCC) in Poznań, Poland from June 20 to June 22. In honour of the 40<sup>th</sup> anniversary of the OECI, we have organised a special event - "2018 OECI Oncology Days" - a two-day conference covering a range of topical issues in oncology. The title of the meeting this year is "Emerging Technologies in therapies against cancer: What the best to select for cancer centres?". The main aim is to focus on the most relevant emerging technologies for cancer patients and cancer treatment centres.

The proposed sessions in this year's meeting include many of the hottest topics in oncology, including "Limiting Invasiveness of radiotherapy", "Debating the Future of Hadrontherapy", "Minimally-invasive Technologies: pros and cons", and "Analysis of Economic Issues for Emerging Technologies in Health Care".

Poznań is a charming university city and we are certain that participants will enjoy the opportunity to explore the city, especially the historic old town. Participants are encouraged to take a tour of our facilities at the GPCC, which is, coincidentally, celebrating its 65<sup>th</sup> Anniversary this year.

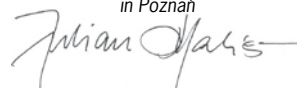

We believe that the university atmosphere of Poznań, together with the long medical tradition in our city, will provide an excellent setting in which to exchange knowledge and to discuss important issues in oncology today. This meeting will also provide an excellent opportunity to meet old friends, as well as to make new friends and new scientific contacts.

The GPCC is truly honoured to be hosting both the OECI meeting and the 2018 Oncology Days Conference. On behalf of the OECI and the GPCC, we look forward to seeing you in Poznań this June.

Sincerely,

Prof. **Julian Malicki**  
Director of the  
Greater Poland Cancer Centre  
in Poznań

## Introduction to the OECl

The OECl is a non-governmental, non-profit Organisation founded in Vienna in 1979 and remodelled in 2005 into OECl-EEIG, a European Economic Interest Grouping, headquartered in Brussels.

Today, the OECl counts 82 Member Institutes, which include some of the most prominent European Comprehensive Cancer Centres.

The OECl is a network of cancer Institutions established to create a critical mass of expertise and competences and contributing to the production and dissemination of knowledge, so as to reduce fragmentation and increase competitiveness. These goals are being achieved by promoting and strengthening the concept of “comprehensiveness”, supporting quality in cancer care also through a well-structured internal organisation.

OECl aims to accelerate the production and application of personalised care approaches, and to ensure equal rights to all cancer patients, with the ultimate goal of finding new and better treatments, providing more comprehensive care and improving patient quality of life, through evidence-based medicine.

The increasing interest from international organisations, stakeholders & the cancer community in the OECl points to the growing importance of a comprehensive cancer network of institutions, where the entire chain of cancer care provision is present.

The dissemination of the OECl activities, reports, proceedings are publicised through the OECl website at <http://www.oeci.eu> and [ecancermedicalscience](http://www.ecancer.org), the Official OECl e-Journal at <http://www.ecancer.org>

## Wielkopolskie Centrum Onkologii

Greater Poland Cancer Centre

[www.wco.pl](http://www.wco.pl)

### Director's foreword

Our Institution uses the most advanced therapeutic methods in the fight against neoplastic diseases with the hope of restoring patients to health while fully respecting their dignity.

### Description of the Centre and history

The Greater Poland Cancer Centre was established in 1953 and is one of the largest oncology centres in Poland and in Europe. The centre provides medical service in the field of oncological surgery, head and neck cancer surgery, radiotherapy, chemotherapy, gynaecological oncology, anaesthesiology, brachytherapy, and diagnostics. Over 20,000 patients are admitted to the hospital each year, and more than 6,000 surgical procedures and 6,500 radiotherapy treatments are performed annually.

### Main research activities

The centre's primary research activity involves clinical studies, such as the high profile clinical trials Hypoprost and Cyberprost for prostate cancer and the HIOB trial for intraoperative breast radiotherapy. EORTC lines of investigation include the following: the origin of ovarian cancer; HPV infection in head and neck cancer; contributions to the cancer genome atlas; the physics-related and biological processes during radiotherapy; the effect of cytostatic agents and ionizing radiation on cancer cells; and molecular imaging in radiation therapy planning.

### Core facilities

Following the European model, interdisciplinary teams provide a comprehensive care according to cancer localisation in the body. These multidisciplinary teams work closely together to treat patients with cancers in a given location, such as the breast, the upper digestive tract, or the head and neck area. These teams are mainly led by physicians from various specialisations (e.g., surgery, radiation oncology, medical oncology) in addition to psychologists, physical therapists, nurses, and other supporting personnel (e.g., social workers or dieticians).

## Education

WCO has established a Teaching and Conference Centre, which aims to serve the needs health care personnel, patients, and medical students from the Poznan University of Medical Sciences as well as other universities. Additionally, a variety of training courses, scientific conferences, and symposia are organised each year for both Polish and foreign physicians and other health care professionals.

The Greater Poland Cancer Centre is also home to the editorial offices of four international scientific journals:

- 1) Reports of Practical Oncology and Radioterapy,
- 2) Letters in Oncology Science,
- 3) Contemporary Oncology and 4) Journal of Contemporary Brachytherapy.

## OECl Pathology Day Development of Clinical Cancer Research

June 20<sup>st</sup>  
IBB Andersia Hotel

*There has been a recent development in oncology that has led to the application of clinical research methods directly to patients under treatment. This is a result of the fact that our knowledge of cancer biology and the sophisticated analytical methods used, go beyond the usual randomization process performed in clinical trials. Indeed, recent literature has shown that individual tumours, within a particular type of cancer, often exceed the most up-to-date molecular classification, and the limits between distinct cancer types. This has recently led to new approaches such as basket, umbrella and platform studies, and to the suggestion of N-1 trials, as already discussed in the meeting held in Brno last year.*

*A necessary prerequisite to this type of clinical studies is the possibility to exchange reproducible analysis results among institutions. The update of the OECl accreditation standards is strongly related to the need to guarantee reproducible investigations. For the above reasons it is mandatory to continue the already started process of standardization and guidelines definition on analytical methods to be adopted, taking also into consideration new molecular morphology approaches.*

**The 2018 Pathology Day Programme includes the following issues:**

1. Introduction to clinical research in today's oncology.
2. New types of clinical studies (N-1 trials, basket, umbrella and platform studies).
3. Standardization of pre-analytical conditions of biological material as a prerequisite for reproducible molecular analysis.
4. New types of methods in molecular morphology: new developments of in-situ hybridization.
5. Rare cancers as an example of analytical methods to be adopted for a better approach to cancer diagnosis and care (EURACAN).

**A Round Table will close the Pathology Day 2018**

## Cancer Outcomes Research Working Group Session

June 20<sup>st</sup>  
IBB Andersia Hotel

### Feasibility of a OECl collaborative study on cancer outcomes

Twentyfour OECl Member (from 14 EU countries) replied to the 75 questionnaires circulated in 2017 to explore the interest and feasibility to carryout outcomes studies. From this survey it emerged that breast (13 centres) and colorectal cancer (10 centres) were most frequently indicated as suitable for outcomes studies, possibly focussing on clinical outcomes commonly available through health, hospital registries, or using the information included in the A&D questionnaire.

The aim of the 2018 Cancer Outcomes research Meeting is:

- 1) **to agree on a few easily collectable and meaningful outcomes indicators**
- 2) **to discuss how to practically conduct a pilot project**

## Supportive and Palliative Care Working Group Session

### A survey of palliative care services in OECl certified centers

The meeting aims to present, discuss and launch a survey on how supportive and palliative care is organised in all the OECl certified centres, standardising the approaches at European level.

The survey will be the basis on which to realise a reference document for cancer patients and European cancer centres/institutes on a common view of supportive and palliative care.

## Scientific Conference

### Emerging technologies in Therapies against cancer: What best to select for cancer centres?

June 21<sup>st</sup>  
IBB Andersia Hotel

#### Session 1 Limiting Invasiveness of radiotherapy

Chair: *Guy Storme*

- 1 Radiotheranostics  
*Patrick. Flamen*
- 2 Imaging Guided & Innovative radiotherapy  
*Piotr Milecki*
- 3 IORT in Rectal Cancer  
*Olga Sousa*

#### Session 2 Debating the future of hadrontherapy

Chair: *Roberto Orecchia*

- 1 Is there a bonus for patients undergoing hadrontherapy so far?  
*Guy Storme*
- 2 9 years experience with protons and 20 years with carbon ions  
*Klaus Herfarth*
- 3 The Italian experience  
*Roberto Orecchia*

#### Session 3 Minimally-invasive Technologies: pros and cons

Chair: *Julian Malicki*

- 1 Endoscopic approach of the solitary pulmonary nodule in 2018  
*Dimitri Leduc*
- 2 Image guided treatment  
*Theo Ruers*
- 3 Head & Neck Robot assisted surgery  
*Wojciech Golusinski*

#### Session 4 Health Economic Issues on Emerging Technologies

Chair: *Wim van Harten*

- 1 How do health systems decide on investing in innovative technologies in Cancer?  
*Josep Borrás*
- 2 Cost effectiveness on scenarios of Introducing Image Guided surgery  
*Valesca Retel*
- 3 Cost effectiveness and decisions on Proton Beam Therapy  
*Alejandro Mazal*

## Annual Meeting of the “Collaboration for Good Practices with Patients” Working Group

June 21<sup>st</sup>  
IBB Andersia Hotel

16.00-17.30 **Expanding Patient Involvement in  
Quality Improvement**

## A&D Working Group Session

16.00-17.30 **OECI re-accreditation proposals: how to focus on  
quality improvements whilst not overburdening  
Centres**

Speaker: *Simon Oberst*

**Discussion by OECI Member Organisations**

### **Theme:**

*As quality of cancer care in European centres generally improves, a whole industry of accreditations and certifications is growing, which places an increasing burden on centres which are developing at different rates. The OECI is committed to quality improvement, and believes that the A&D Programme is a flagship for European Accreditation systems, which needs to remain robust and set high standards. But re-accreditation processes every 5 years need to be nimble and focus on areas of need for improvement, rather than re-auditing well-established systems. This meeting is being called to make draft proposals to member organisations and gain feedback.*

08.00 Registration

08.15 **General Assembly Constitution, welcome and approval of the Agenda**  
*Dominique de Valeriola*

08.30 **Session 1: Administrative and financial matters**  
*Chairperson: Dominique de Valeriola*

**Point 1: Approval of June 2017 General Assembly's Minutes**

(vote requested – decision taken at the simple majority of the OECI Full Members present or represented)

*Dominique de Valeriola*

**Point 2: Approval of the Financial Statement 2017 and discharge to the Board**

(vote requested - decision taken at simple majority of the OECI Full Members present or represented)

*José Laranja Pontes*

**Point 3: OECI 2018 Provisional Budget**

(decision taken at simple majority of the OECI Full Members present or represented)

*José Laranja Pontes*

**Point 4: OECI Board composition**

*Dominique de Valeriola*

**4.1 Board composition for the coming years**

(vote requested - decision taken at simple majority of the OECI Full Members present or represented)

**4.2 Hand-over of the 2014-2018 Presidency, and transfer of powers to the 2018-2021 Presidency**

(vote not requested)

**Point 5: Working Groups and Co-opted Board Members update**

(vote not requested)

*Thierry Philip*

**Point 6: OECI Membership**

*Claudio Lombardo*

**6.1 New applications for membership**

(vote requested for full membership - decision taken at unanimity of the OECI Full Members present or represented; for associated membership - decision taken at simple majority of the OECI Full

Members present or represented)

**6.2 Change of denomination of some  
OECI Members**

**Point 7: Oncology Days for the coming years**  
*Thierry Philip*

**CEREMONY FOR THE DELIVERY OF THE  
OECI ACCREDITATION CERTIFICATES 2017-2018**

*Thierry Philip and Simon Oberst*

**List to be announced**

10.45 Coffee break

11.00 **Session 2: The OECI Strategy and Working Group activities**  
Chairperson: *Thierry Philip*

**Point 8: Working Groups activities**

**8.1 Accreditation & Designation**

*Simon Oberst*

**8.2 Collaboration for good practices with patients**

*Dominique de Valeriola*

**8.3 Biobanks and Molecular Pathobiology**

*Giorgio Stanta*

**8.4 Cancer Economics and Benchmarking WG**

*Wim H. van Harten*

**8.5 Cancer outcomes research**

*Milena Sant*

**8.6 Supportive and palliative care**

*Tiina Hannele Saarto*

**Closure of the 2018 General Assembly**

*Thierry Philip*

13.00 Lunch

## Social events

June 21  
20.00 hrs.

### Gala Dinner

#### Bazar Poznański

Marcinkowskiego 10 street  
Poznan  
[www.bazarpozanski.pl](http://www.bazarpozanski.pl)

The Poznański Bazaar is one of the most important symbols of Poznań and Wielkopolska. It was established in 1838 thanks to the initiative of Karol Marcinkowski and the company established by him, whose aim was to build a hotel for Polish clients and shops for Polish buyers. The bazaar quickly became the centre of Polish economic, political and cultural life. It was also the most important mainstay of Polishness in the Prussian partition.

The history of the Bazaar has always been intertwined with the history of Poland. In 1990, the Bazar Poznański company, existing continuously throughout the post-war period, took legal action and recovered the destroyed buildings of the Bazar Hotel. In 2005, the façade renovation from Aleja Marcinkowski was completed, restoring its rich neo-baroque appearance. After years of break, the company also returned to the culinary traditions opening the first restaurant, which because of the history of this place was called "Bazaar 1838". Bazar Poznański SA actively participates in cultural events in Poznań, supporting and promoting art. In cooperation with the Grand Theater Stanisław Moniuszko in Poznań initiated a series of concerts "Opera in the Poznań Bazaar", which regularly take place in the restored White Room.

## Poznań not only for a congress

Poznań, one of the biggest and the oldest Polish cities is well-known for hosting international fairs and congresses on the grounds of Poznań International Fair. However, a trip to the capital city of the Wielkopolska region can also become a pretext to visit one of Poland's most interesting cities, inextricably linked to the very beginnings of Polish statehood. It was here that Duke Mieszko the First had chosen for his borough; it was also probably where he was baptised in 966, thereby joining the ranks of medieval European rulers. This very event is thought to have been the beginning of Polish statehood. This story, as well as many more, are told at Porta Posnania - the state of the art multimedia heritage interpretation center, located in the Śródka district of Poznań. Ages ago it was a separate little town and Śródka has managed to preserve some of this small town charm and atmosphere to this very day. Nowadays, it has undergone a major gentrification and is home to many little restaurants and bars. One of the district's most noticeable attractions is the fairytale, 3-dimensional mural on the wall of one of its townhouses.

When visiting Poznań, it would be impossible to miss Stary Rynek (the Old Market Square) with its magnificent Renaissance Ratusz (Town Hall). On its tower, every day exactly at midday, Poznań's famous billy goats butt their heads a dozen times. The Old Market Square also hosts Poznań Croissant Museum in one of its townhouses directly opposite the Town Hall. You will not find any museum cabinets filled with exhibits - there are however live audience participation show-and-tells, where you can both taste and learn the secrets of the St Martin's Croissants, one of Poznań's most famous delicacies.

The Old Town is the beating heart of this city of half a million, with around 120 thousand students residing within its limits, including those from Europe and other continents. They are one of the reasons Poznań is alive and kicking almost day and night. Numerous bars, clubs and restaurants await the visitors at any time of the year.

The past and present interlock in Zamek Cultural Center, which is the former Imperial Castle. Castles are usually famous for their history dating back to the days of yore - but Poznań castle is unique. It is Europe's youngest castle built for a crowned ruler. It was built in 1910 for the German Emperor William the Second, and its history is just as complex as the entire 20th century. Today, it houses one of Poland's biggest cultural institutions, organizing hundreds of concerts, festivals, exhibitions and other events every year.

Another place where various worlds meet and mesh is Stary Browar - a shopping, arts and business center which is an adapted former 19th century brewery, hence its name. In 2005 it was awarded the title of Best Shopping Center in the World in the medium-sized commercial buildings category by the International Council of Shopping Centers.

The modern continuator of Poznań's beer traditions, dating back to the medieval times, is Lech Browary Wielkopolski. Lech is one of Poland's most beloved and popular beer brands. The Lech Brewery is also available for guided tours, which show the visitors all the stages of beer production and conclude with a beer tasting.

The center of Poznań is compact enough for on foot or cycle sightseeing - in fact, it offers nearly 90 city bike stations to choose from. This way you can visit Lake Malta, one of Europe's best and most picturesque professional regatta courses. For Poznań residents it is one of the most beloved places of active leisure, with an all-year-round ski slope and an impressive Aqua Park - Termy Maltańskie, with a few dozen saunas and many other water attractions.

These are only a selected few of the many attractions Poznań has to offer, and we haven't even touched upon Poznań's surrounding areas with the Castle in Kórnik, the meticulously renovated Palace in Rogalin, showing the everyday lives of the 1930s aristocracy, or Wielkopolski National Park with its unique postglacial landscapes.

## Tourist attractions

### 1. The Cathedral Island and Porta Posnania

The Cathedral Island (Ostrów Tumski) is the oldest part of Poznań. This is the place where the first settlement was erected by the Piast dynasty in the 10<sup>th</sup> century. You can visit the oldest Polish cathedral. It is believed that the remains of the first Polish sovereigns, duke Mieszko I and king Boleslaw Chrobry, are buried here.

Here you will also find the remarkable Porta Posnania or "Gate to Poznan". It attracts its visitors with a multimedia display, educational workshops, cultural events and tours. It presents the fascinating history of Cathedral Island. The Porta Posnania is a perfect starting point for exploring the city along the Royal-Imperial Route. More: [www.portaposnania.eu](http://www.portaposnania.eu).

### 2. The Old Market Square – heart of the city

The Old Market Square and its surroundings are among the most interesting places to see in Poznań. The beautiful Renaissance town hall with its famous mechanical billy goats on a clock tower, the old houses, charming side streets, numerous museums, pubs, cafes and people walking the streets – all of this creates the unique atmosphere of the place. The Old Market Square is the heart of Poznań. From spring to autumn, surrounded by pavement cafes, the Square is bustling late into the night. It also hosts numerous events, performances and concerts. More: [www.poznan.travel/en](http://www.poznan.travel/en)

### 3. The youngest castle in Europe

This huge neo-Romanesque building, designed by Franz Schwechten, was constructed in the years 1905-1910 for German Emperor Wilhelm II. It means that it actually is the youngest castle in Europe which was built for a monarch. After WWI when Poland regained its independence, the Castle housed the faculty of mathematics of Poznań University, whose graduates broke the German Enigma code in the 1930's. During WWII all its interiors were redesigned in the style of the Third Reich under the supervision of Albert Speer. Nowadays this unique structure is a cultural centre and a monument or metaphor of the whole complicated 20th century. It is surrounded by the so called Imperial District, erected to express the greatness of Wilhelm's Germany. More: [www.ckzamek.pl](http://www.ckzamek.pl)

### 4. Old Brewery perfect for shopping

Stary Browar (Old Brewery) is a shopping, culture and business centre, located in the former Hugger Brewery Buildings from the 19<sup>th</sup> century. Unusual architecture enters into a dialogue with the site's industrial past, a multitude of nooks and crannies hide mementos from the beer brewing times: ceramic seals, interior design elements, plaques. Stary Browar holds numerous awards including Best Shopping Center in the World in the medium-sized commercial building's category (International Council of Shopping Centers 2005). More: [www.starybrowar5050.com](http://www.starybrowar5050.com)

### 5. Poznań Croissant Museum and Experience

Poznań Croissant Museum and Experience is a vibrant centre cultivating Poznań's tradition and culture. Located in the very centre of the city it offers fantastic views of the City Hall Tower with its legendary mechanical fighting goats. This is the place to be for everyone who wants to know Poznań better and quickly become familiar with its symbols, especially the famous and one of the most recognizable symbols of the city, Saint Martin Croissant. More: [www.rogalowemuzeum.pl/en](http://www.rogalowemuzeum.pl/en)

## 6. Lech Visitors Centre

A tour of the brewery is very different from your usual museum or movie trip. A lot happens here, and it is all happening in front of your very eyes. Owned by Kompania Piwowarska (Brewing Company), the Poznań brewery is one of the most state-of-the-art in Europe, and the brewers working here are highest class specialists.

Just as the brewery is one of Poznań's flagships, the Lech Visitors Centre tour guides are the showcases of the brewery. They are highly professional staff who, apart from an excellent knowledge of the brewery's history and topography, also know everything about the various stages of beer production. A visit to the pub and a beer tasting is the last stop of the tour of the brewery.

A glass of beer straight from the heart of the brewery itself will be served by a skilled bartender who knows all the dos and don'ts of beer craftsmanship. We highly recommend the refreshing LECH PREMIUM or the regional LECH PILS. Welcome! More: [www.zwiedzaniebrowaru.pl/en/](http://www.zwiedzaniebrowaru.pl/en/)

## 7. Archaeological Museum (Górka Palace)

Poland's only actual obelisk from ancient Egypt, tools used several thousand years ago by the first inhabitants of present-day Greater Poland, funerary urns in the shapes of faces - these are some unusual sights that can be seen in the Archaeological Museum in Poznań. This is one of the oldest, largest and most active museums in Poland. More: [www.muzarp.poznan.pl/en/](http://www.muzarp.poznan.pl/en/)

## General information about Poznań

### 1. Transport

Poznań is situated at the crossroad of the largest European transportation routes, connecting Moscow with Berlin, Paris and Madrid and also Budapest and Prague with the Baltic coast and farther on with the Scandinavian Peninsula. Thanks to its excellent location, the city is easily accessible by plane, train or car.

#### By air

Main Poznań's international airport is the Henryk Wieniawski Poznań Ławica Airport (IATA code: POZ). The airport provides flight connections with multiple destinations, including important hubs in Copenhagen, Munich, Frankfurt Main and Warsaw. Besides regular connections with four European hubs, it also offers the services of low fare airlines other capital and major cities, like Madrid, Barcelona, London, Stockholm, Oslo, Dublin, Tel Aviv, Rome, Athens and more.

Poznań Ławica Airport works alongside some of the world's most well-known airlines: Lufthansa, LOT, SAS, Ryanair and Wizzair.

The airport is located mere 7 kilometers from the city center, in the vicinity of the route leading directly to the major points of interest and tourist attractions. The most convenient way to get to the city is to use the public transport (day bus no. 59/ the night line no. 242) or to take a taxi. The taxi ranks are situated outside, next to the arrival terminal. The average fare from the airport to the city centre amounts to €5-7, while the single bus ticket costs €1.10.

For more information please visit the official website of Poznań Ławica Airport: [www.airport-poznan.com.pl/en/](http://www.airport-poznan.com.pl/en/)

#### By train

Poznań is a major railway hub with trains arriving from all over Poland and abroad. The journey to Berlin, Warsaw or Wrocław takes from 2.5 to 3 hours. All trains stop at the centrally-located Poznań Główny main station, from where it is easy to reach every district of the city.

The most frequent, daily connections include:

- Berlin to Poznań - approximately 4 direct connections,
- Frankfurt - connection from Frankfurt to Poznań (transfer in Berlin),
- Cracow to Poznań - approximately 9 direct connections,
- Warsaw to Poznań - approximately 16 direct connections.

More information can be found on the official website of PKP Polish Railways: [www.rozklad-pkp.pl/en](http://www.rozklad-pkp.pl/en)

#### By car

Poznań lies half way between Warsaw and Berlin. It can be reached by the A2 (E30) motorway from Warsaw (310 km) within 3 hours. The E30 motorway takes drivers directly to Amsterdam and in Germany (12 Autobahn) to Berlin, which is only 2 hours 40 minutes from Poznań (270 km). The city can be accessed as well from domestic roads - the 92 (east-west) and the 11 (north-south).

### 2. The City

With its 550.000 inhabitants, Poznań is one of Poland's largest cities. Located in the West of the country, it is an important historic, economic, cultural and academic centre. More than 130 thousand students make the city teem with life. Poznań is well-known for hosting international fairs and congresses on the grounds of Poznań International Fair. However, this is also a place where over 1.000 years ago the Polish

State emerged. The most visited tourist attractions include the Cathedral Island (the oldest part of the city, dating back to the 10<sup>th</sup> century), The Old Market Square with 16th-century Renaissance Town Hall, former Imperial Castle (the youngest castle in Europe built for a monarch in the years 1905-1910), Old Brewery, awarded the title of the Best Shopping Center in the world in 2005 and Poznań Croissant Museum and Experience, where secrets of the local delicacy, Saint Martin Croissant are revealed.

### 3. Climate and weather

Poznan lies in the temperate zone characterized by significant temperature variations. Winters are generally wet with temperatures falling below zero, while summers tend to be warm. The hottest months are July and August (when temperatures exceed 25C).

### 4. Currency

Poland 's legal tender is the Polish zloty (PLN), which is divided into 100 groszy.  
€1 = ca. PLN 4,16 (NBP rate as of 08.01.2018).

The currency may be converted at exchange points, in banks and hotels. The majority of shops and restaurants accept credit cards. The most popular are VISA, MasterCard and Maestro. American Express and Diners may not be accepted. It is common to use contactless credit cards. Traveller's cheques are not accepted.

### 5. Health & Emergency

In the case of an emergency, mobile phone users should dial 112 to be forwarded to the police, fire department or ER. From a landline or public phone dial the following: Ambulance: 999; Fire: 998; Police: 997.
