OECI 2017 Calendar Welcome

The OECI is the only existing European Organisation of cancer centres regrouping around 78 of the most well-known comprehensive and clinical cancer centres and other institutions, actively working in the field of cancer.

The OECI's mission is to create favorable conditions for ensuring correct diagnosis and decreasing inequalities in cancer care for patients, throughout Europe, by improving the quality and the internal organisation of the cancer centres, through integration of research and education into a multidisciplinary approach, which includes the involvement of cancer patients.

The Organisation is unique on a European scale and, as such, should play an indispensable role in helping Europe and its Member State authorities adapt their cancer health systems. Our Members play a primary role in the above mentioned exercise, confirming that the OECI is an inclusive Organisation, which offers the European cancer community the possibility of accessing the expertise and knowledge developed by the entire network of comprehensive cancer institutions.

The 2017 edition of the Calendar, together with the OECI Newsletter, the OECI Yearbook and the Accreditation and Designation Manual, are the main instruments “branding” the OECI as the European network of cancer centres; a major actor in the struggle against cancer.

You are invited to download all the OECI publications from www.oeci.eu

It is our pleasure to present the 2017 OECI Calendar, promoting the milestones and fundamental OECI collaborations.

We hope that the European cancer community and the European and National Authorities will appreciate all the efforts made by our extended and synergetic membership.

The OECI network

The “Organisation of European Cancer Institutes” is a European Economic Interest Grouping established in 1977 to promote greater cooperation among European cancer centres and institutes. Its founders designed a structure aimed at promoting efficient partnership across Europe, notwithstanding its linguistic barriers and traditional research heterogeneity.

The OECI Central Office is located in Brussels while the Coordinating Secretariat and Liaison Office is located in Genoa.

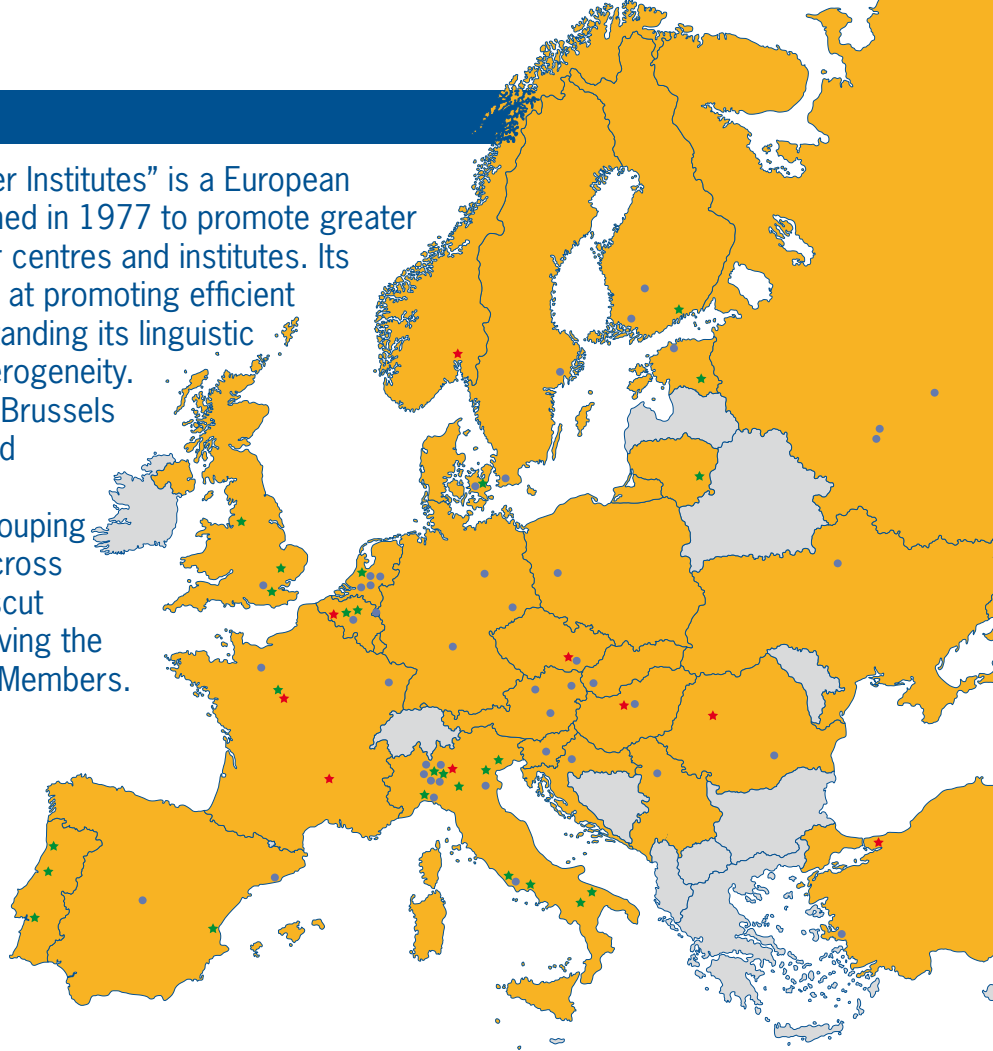

The OECI is a network presently regrouping 78 cancer centres and institutions across Europe, dynamically working in crosscut expertise projects organised by involving the OECI Working Groups, Activities and Members.
