OECI Accreditation Projet

Dr. Mahasti Saghatchian
Chairwoman OECI Accrediation WG

OECI General Assembly
15 June 2007, Copenhagen

Dear colleagues,

It is our pleasure to inform you about the Accreditation project of the Organisation of European Cancer I titutes (OECI). Once again, we wish to stress the importance of this project, which is in direct line with organisation's objective: to improve quality of care in order to reduce mortality and morbidity related to a cer.

The process of accreditation will target quality of cancer care specifically, in the spirit of OECT's fundamen concepts. It will not restrict to therapy but will take into account prevention, research, development and e cation. Eventually, it should lead to the labelisation of Cancer Institutes.

We want to provide equity for our patients, to guarantee them that they are treated in high-quality strucu res dedicated to cancer care, thouroughly evaluated and available throughout Europe. To achieve this goal, want our centres to integrate the principles of quality, innovation and evaluation which are at the heart of t Cancer Institute accreditation process. We have already agreed on the importance of a global view of can and the cancer patient of multidisciplinarity and of translational research. We have defined the major lines development within prevention, care, research and education. Further, we will focus on follow-up, paties role, organisation and communication.

Accreditation remains a voluntary process initiated by the centres represented by OECI and achieved by the centres themselves. This brockure aims at presenting you the main actors and driving lines of the project.

As you will see, our objectives are to set standards and criteria for quality multidisciplinary cancer care de ered in cancer centres throughout Europe, to survey the cancer centres to assess compliance with those st dards, to collect standardised and quality data from approved cancer centres, to measure treatments patte and outcomes. We aim at using the data to evaluate cancer centre provider performance and develop effect systems and interventions that will allow us to improve cancer care outcomes at the national and Europi level.

The huge effort undertaken here needs close collaboration among all the stakeholders involved in the fit against cancer. We invite you to join this concerted European action I

Looking forward to hearing from you soon,

Steering committee:

Dr Mahasti Saghatchian, OECI WGA Chairwoman, Ville juif

Pr Wim van Harten, NKI-AVL, Director, Amsterdam

Mr Henk Hummel, OECI WGA Project Manager, Gröningen

Pr Ulrik Ringborg, Karolinska Institute Director, President OECI, Stockholm

Dr Dominique de Valeriola, J. Bordet Institute Director, Brussels

Pr Thomas Tursz, IGR Director, President FNCLCC, Villejuif

Pr Renée Otter, CCCN Director, Graningen

The Organisation of European Cancer Institutes: Message from the President

Dear OECI Members.

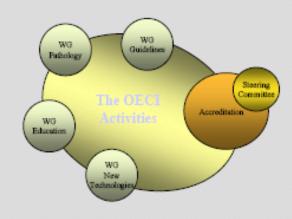

First, I am grateful to the 2005 General Assembly of the OECI in Piraeus for entrusting me with the mission to chair the Organisation in the next 3 years. No doubt, this is an interesting and very important mission, and I look forward to the challenges and to a constructive cooperation with all of you Members of the OECI.

We all know that the cancer problem is increasing both in Europe and worldwide. Despite clear progress and successes in cancer treatment, analysts observe that cancer care and research remain too fragmented across Europe. Fragmented ancology makes it difficult to progress fast and to put our collective know-how and resources to best use for affordable, high-quality cancer care. We all agree that the comprehensive view of the cancer patient is a key to success, with the consequence that cancer care should be organized around multidisciplinary teams.

We know that at present, 50-60% of cancer patients are cured by treatment. To improve this outcome, innovation is important. Research and education are other components that should be integrated with care and prevention. The OECI is working on a programme to develop comprehensiveness in the cancer area. With a

common vision, aims and objectives of the European oncology will be developed to reach comprehensiveness, in practice an integration of prevention, care, research, development and education. Integration should be an accepted goal of all Cancer Centres, be they part of Cancer Hospitals or virtual Cancer Centres linked to university hospitals...

It is important for our organisation to realize that we, the cancer centres, have a major role to play in translation and that innovation in care is one of our main objectives. Who else will play that role if the cancer centres do not take on that challenge?

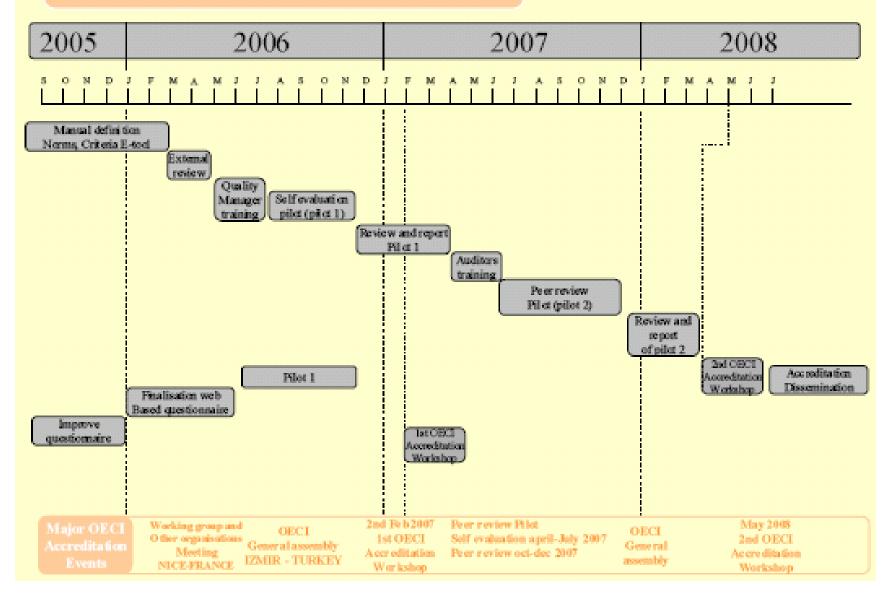

Dear Friends, the increasing cancer burden in Europe is a problem we all share. Increasing quality, effectiveness and enhancing our resources require strong collaboration and a strategy which will influence the political and decision-making systems in the right direction. The OECT's vision and strategy should be used for this purpose. With my kindest regards, Sincerely yours,

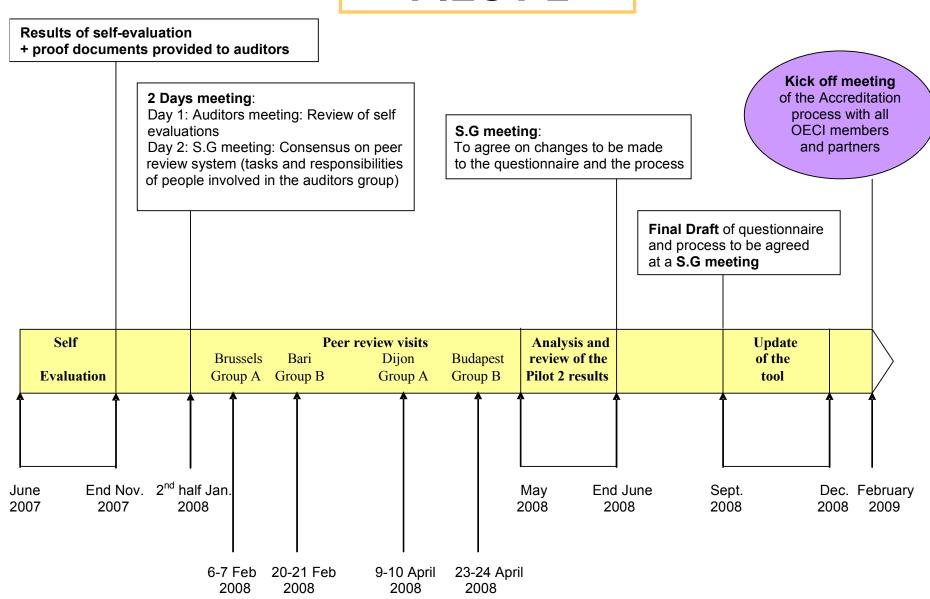

Pr Ulrik Ringborg OECI President

OECI Accreditation Projet

7FP Call:

"Disease networks of centres of reference"

Quality Improvement in Europe : a case-study with cancer

30th January 2007

Plan

* The Project

Expected Impact

* 7th PCRD's rules

* Calendar

The Project

HEALTH-2007-3.4.1: Disease networks of centres of reference.

Scoping study on the feasibility of developing guidelines, criteria and areas to develop European networks of centres for diseases requiring a particular concentration of resources or expertise, which would also be focal points for research, information dissemination and evaluation and medical training

Funding scheme: Coordination and Support Action (Support Action)

Deadline for Submission: 18 Sept 2007

Expected Impact

These small and targeted
 Coordination and Support actions
 should help achieving the objectives
 across the activity:

« Optimising the delivery of health care to European citizens »

PCRD Rules (1)

Co-ordination and support action (supporting)

At least 1 independent legal entity

Normally focused on:

=> one specific activity and often one specific event

Target Audience:

=> Research Organisations; Universities; Industries (including SME); Research programme managers and owners

Size and Resources:

- ⇒The size, scope and internal organisation of coordination and support action can vary from research theme and from topic to topic
- ⇒Expected funding 300 000 Euros

Objectives of support actions

- "Support actions" aimed at contributing to the implementation of the Framework Programmes
- and the preparation of future Community research and technological development policy
 - Gathering data
 - Prepapre a methodology applicable
 - Conference for dissemination with other disease groups
 - Labelisation working group
- or the development of synergies with other policies,
 - Link with guidelines
 - Link with registries
 - Link with eurocare

Objectives of support actions

- or to stimulate, encourage and facilitate the participation of SMEs, civil society organisations
 - Europa Donna (advisory/review Board)
 - Lynn Bowel's campaign
 - Prostate guys
- and their networks, small research teams and newly developed or remote research centres
 - Networking of centres with the others / non core centres
- in the activities of the thematic areas of the Cooperation programme, or for setting up of research intensive clusters across the EU regions.

PCRD Rules (2)

Indicative Average Duration:

```
=> 48 months
Activities:
⇒Such as:
Conferences; seminars;
1 huge conf
working groups;
Fact finding; monitoring: development of the tool
strategy development: methodology for other diseases
expert groups: labelisation group
operational support and dissemination: oeci
Training (auditors)
```

Management of the consortium: oeci

- Scoping study : prepare further actions
- on the **feasibility**: pilot
- of developing guidelines
 - for good clinical practice (cocancpg)
 - For procedures of quality evaluation and improvement
 - For patient information
 - For networking
- criteria and areas : tools box (questionnaires)
- to develop European <u>networks of centres : networking</u> <u>around / among the centres of refenrence (WG), OECI</u> <u>dissemination</u>

- for diseases requiring a particular concentration of <u>resources</u> or <u>expertise</u>: quality and quantity requirements for a cancer centre
- which would also be focal points for <u>research</u>, information <u>dissemination</u> and <u>evaluation</u> and medical <u>training</u>
- Centres of reference : LABELISATION WG (develop methodology for labelisation and the labels)

Question: how the accreditation tool can lead to labelisation of centres of reference

Workplan

- Workpackages (to write and circulate before OECI GA Copenhagen : meeting in Copenhagen)
 - Management (MS)
 - Quality tool and process (HH and RO)
 - Electronic guide
 - Criteria Indicators (for good quality care and for improvement)
 - Peer review
 - Labelisation methodology / labels (DdV, UR, WvH, JBB)
 - Guidelines / networking (BF RO)
 - CPG
 - Procedures for good practice
 - Patient info
 - Procedures for regional networking
 - Dissemination and outreach (MS)
 - Training, capacity building (MS): cocancpg

- Coordinator : OECI
- Partner : INCA (Cocancpg : C Barrat)
- Partner : Eurochip (Andrea Micheli in Milan)
- ACRONYM :
- Organisation and structure : Acc WG, Acc SG, Adv
- Subgroup to prepare the work and write the grant :
 MS

- Involve stakeholders +++
 - Patients organisation
 - Professional organisations (ESTRO, ESMO, EONS, ESSO, Eusoma, EORTC): advisory Board
- What is going to have impact on patients health: (publi from Scotland...)
 - Developping indicators
 - Improve services, processes and structures
 - Improve information available for patients

Plan the time factor!

- Tool for internal, national, European quality improvement
- Methodology for labelisation
- Peer review through advisory board to be planned
 - Patients
 - Clinicians
 - Policy makers

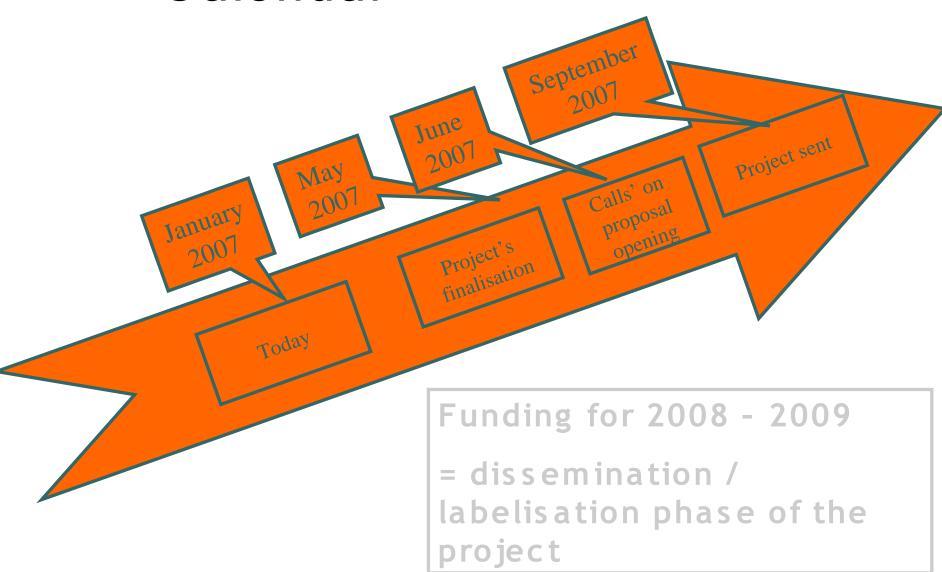

Final Objective:

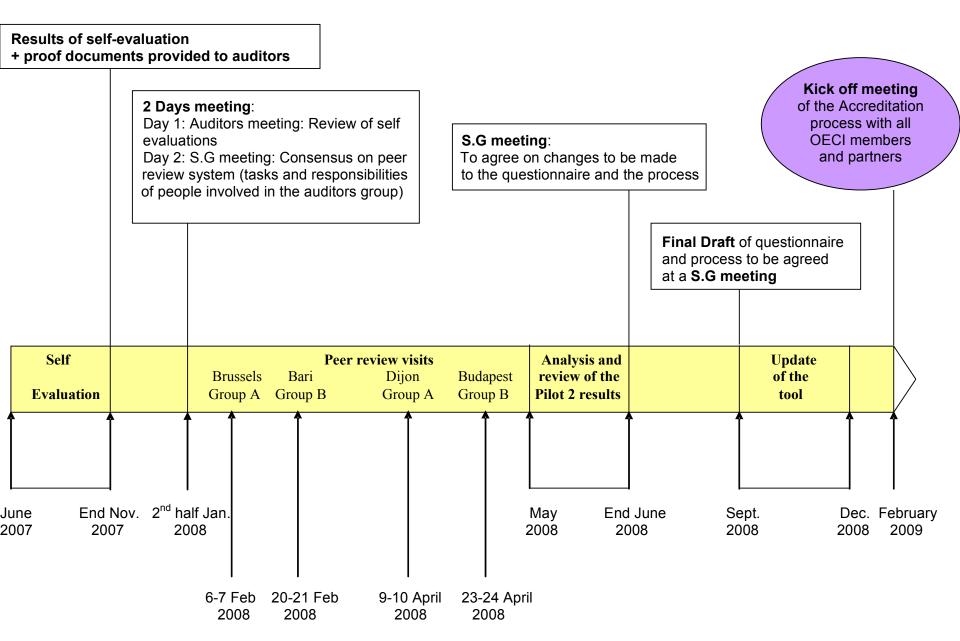

Spread best practice across Europe

Quality

Excellence

Calendar

<u>Group A</u>: Renée Otter, Wim van Harten, Mia Bergenmar, Jean-Benoît Burrion, Henk Hummel, Cécile Tableau. <u>Group B</u>: Renée Otter, Dominique de Valeriola, Jolanda Maaskant, Mahasti Saghatchian, Henk Hummel, Cécile Tableau.
