The OECI Strategic Priorities

- **Supportive and Palliative Care**
  - OECI is particularly involved in the care of patients suffering from rare cancers. An even higher discrepancy in patient survival and outcomes between population and clinical sets of patients will be possible, using EUROCARE and High Resolution data on cancer outcomes research.
  - The Cancer Outcomes Research Working Group has been activated in response to the need of following-up cancer research and translation to patient care. To this effect, the group is developing and implementing an ONCology Outcomes Research Network (ONCORN), which is a novel approach to identify and explore better care models and pathways for both patients and healthcare systems.

- **Biobanks and Molecular Pathobiology**
  - The Biobanks and Molecular Pathobiology Group is evaluating, promoting and launching a wide range of projects involving patients and patient organisations. The OECI Collaborations for Good Practices with Patients (CGPP) Working Group is currently engaging patients, patient representatives, organizations, and other stakeholders in the development of a collaborative framework for the development of evidence-based standards and guidelines for cancer care.

- **Patient Involvement and Partnerships**
  - Today, innovative cancer centers are taking initiatives, involving patients and launching collaborations with local and national patient organizations. The OECI is particularly interested in patients’ engagement, to ensure that the perspectives of patients are taken into account in the development of new cancer care models, and to improve the quality of care provided to all patients. The OECI Collaborations for Good Practices with Patients (CGPP) Working Group is currently engaging patients, patient representatives, organizations, and other stakeholders in the development of a collaborative framework for the development of evidence-based standards and guidelines for cancer care.

- **Quality Improvement in Cancer Care and Research**
  - The Accreditation and Designation Programme, as well as the Certification of European Cancer Centres, aims to constantly improve the quality of care provided to all patients, reducing fragmentation and increasing the competitiveness amongst European cancer centres and institutes. The OECI aims to promote efficient partnership, reduce fragmentation and increase the competitiveness amongst European cancer centres and institutes. The OECI's mission is to fulfill today's patients' expectations.

- **OECI and the EU**
  - The OECI is a European Union-funded programme, which aims to promote efficient partnership, reduce fragmentation and increase the competitiveness amongst European cancer centres and institutes.
  - The OECI's mission is to fulfill today's patients' expectations.

- **Development of the Future in European Cancer Care**
  - The OECI is developing a comprehensive plan to accelerate the application of multidisciplinary personalised care approaches, which aim to provide better care to patients with cancer. The OECI's Strategic Priorities include the development of new cancer care models, which aim to improve the quality of care provided to all patients, reduce fragmentation and increase the competitiveness amongst European cancer centres and institutes.

- **OECI Objectives**
  - The OECI aims to promote efficient partnership, reduce fragmentation and increase the competitiveness amongst European cancer centres and institutes.
  - The OECI's mission is to fulfill today's patients' expectations.

- **OECI Governance and Activities**
  - The OECI is governed by a Board of Directors, which is elected by the Members of the OECI. The OECI Board of Directors is responsible for the strategic direction and governance of the OECI's activities. The OECI has also established a Working Group on Supportive and Palliative Care, which aims to improve the quality of care provided to patients with cancer.
