Strategy 2.0 Patient involvement Karolinska CCC

Eva Jolly & Yvonne Wengström

Long-term objectives 2022-2025

Patient empowerment - the patient as an active partner

Precision health - we aim to offer all patients an individualized care and treatment strategy

Patient involvement

The “2.0 strategy for patient involvement” aims to involve patients and relatives to become active partners

The strategy is based on involvement on different levels; strategic, operational, individual and in specific projects

Strategic level

The representatives from the Patient and Relatives Council meets with the management team 4 times a year

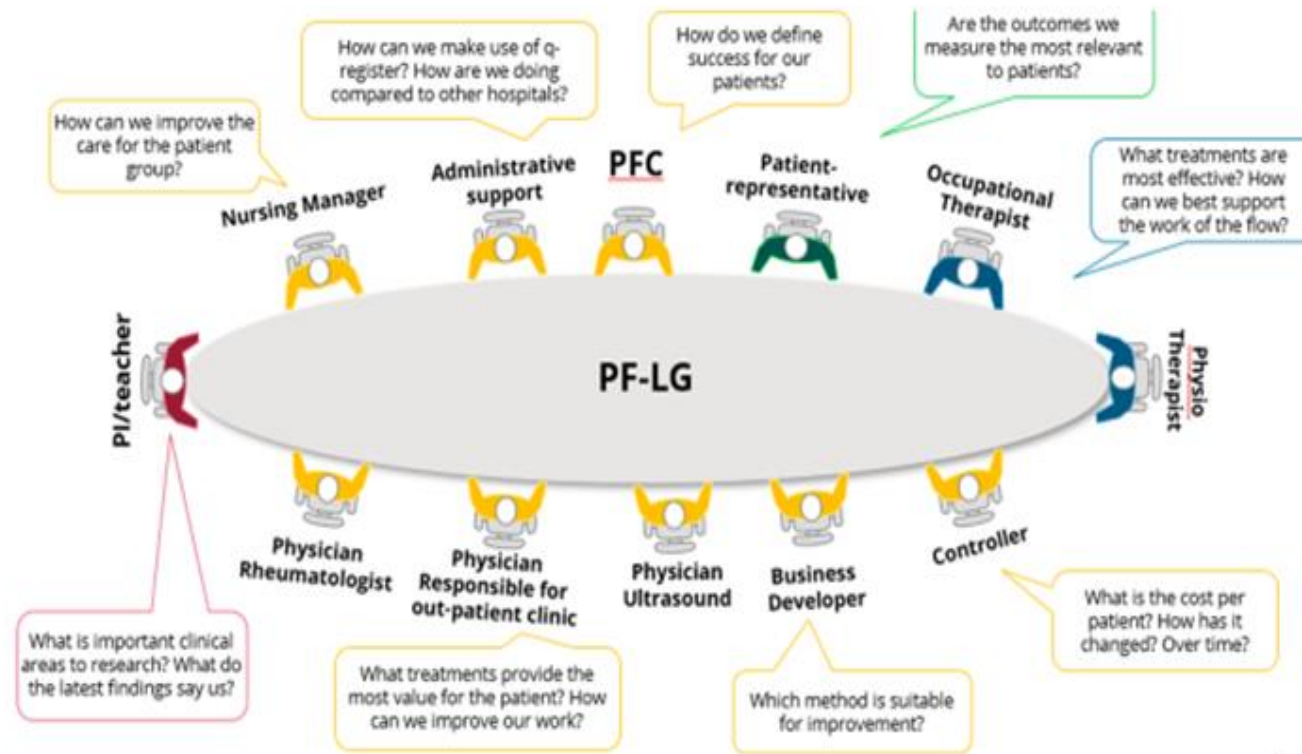

Term of office 3-4 years (overlapping)

Examples from the agenda:

- Relevant outcome data to be published
- Governance and organizational development
- Continuity of care, access to care

Pathway management team lead by PFC with broad representation from interdisciplinary/-professional team

Operational level

- Collaboration with patient representatives on processes that are important for the outcome of care in the patient flow
- 2 Representatives
- Term of office – 3-4 years (overlapping)
- Joint evaluation of collaboration

Projects - for individual projects, there is a close collaboration between patient representatives and project managers.

Karolinska
Institutet

Karolinska Comprehensive Cancer Center

“One number in” a project to increase accessibility for patients with post-treatment symptoms

“The PRISM treatment program” – Promoting Resilience in Stress Management, support for young people undergoing cancer treatment

Success factors for collaboration

Education for patients and clinicians

Clear agenda for meetings

Minutes – with named person in charge of actions

Mandatory participation

The lead -an improvement leader

Reimbursement for patients

Thank you!
