QUALITY AND REDUCE INEQUALITIES**

WARSAW 2026

**GENERAL ASSEMBLY AND
SCIENTIFIC PROGRAMME**

17 - 19 June 2026

**PRELIMINARY
ANNOUNCEMENT**

President's Welcome

*Dear OECI Members,
Dear Colleagues and Friends*

The OECI Oncology Days represent a privileged moment for meeting, reflection, and exchange among our members, an opportunity to share achievements, discuss emerging challenges, and jointly define future priorities in the fight against cancer.

Warsaw, a city symbolizing rebirth, innovation, and resilience, offers an ideal setting to reflect on what OECI has accomplished in recent years and how we can continue to grow as a European community of cancer research and care.

For me, this meeting holds a special meaning, as it marks the conclusion of my term as President of OECI, allowing me to look back with gratitude and pride on the journey we have shared together.

Over the past three years, we have made significant progress in strengthening OECI's role as a network of excellence and a driver of European integration. Among the results I would like to highlight:

- our participation, as leaders and/or beneficiaries, in several European projects that will undoubtedly shape the future of our Organisation, with the commitment to pursue the initiatives undertaken, which will offer concrete opportunities to improve therapeutic options and the quality of life for our patients;
- the revision of standards and the expansion of the OECI Accreditation and Designation Programme, which today involves more than 60% of our Members in Europe and beyond, helping to spread a shared culture of quality and continuous improvement;
- the launch of new training and networking initiatives aimed at promoting collaboration among young researchers, clinicians, and managers of cancer centres;
- our efforts to strengthen the translational and interdisciplinary dimensions of cancer research, encouraging an increasingly integrated model of patient care and scientific innovation;
- the expansion of OECI's international dimension, with new partnerships and exchanges that have enabled us to share experiences and expertise on a global scale, setting a model to be followed in other continents.

All this would not have been possible without the dedication, competence, and vision of our Members, who represent the true strength of OECI:

To each of you, I express my sincerest gratitude

As my term comes to an end, I also wish to share with you my determination to continue working actively with OECI, focusing particularly on the development of international relations. I am deeply convinced that the future of our Organisation lies in its ability to build bridges between disciplines, between centres, between countries, and between continents.

The Oncology Days 2026 will therefore represent not only an opportunity to celebrate our achievements, but also to renew our commitment to a more cohesive, inclusive, and forward-looking network.

Although European institutions increasingly recognize OECI as an authoritative interlocutor in shaping cancer control policies, the next presidency will be called upon to further strengthen dialogue with both national and European authorities.

I am confident that the new OECI Presidency, under the leadership of Professor Iwona Lugowska, will continue and strengthen the path we have embarked upon, giving new impetus to the process of integrating the activities of Europe's most prestigious cancer institutes, and extending OECI's objectives beyond European borders.

I therefore hope that the OECI Oncology Days 2026 will provide a constructive dialogue, mutual inspiration, and renewed energy in our shared goal: to ensure that cancer patients receive treatments that are ever more effective, personalised, and respectful of the dignity of each individual.

To conclude, we are immensely grateful to the Maria Skłodowska-Curie National Research Institute of Oncology for kindly offering to host this edition of the OECI Oncology Days. We hope you will enjoy the OECI Oncology Days 2026 in Warsaw, an event that celebrates the 48th Anniversary of the OECI Foundation.

OECI2026 ONCOLOGY DAYS

Welcome to the Oncology Days 2026!

We are delighted to welcome you to Warsaw for the OECI Oncology Days 2026, hosted by the Maria Skłodowska-Curie National Research Institute of Oncology. It is a privilege for our Institute – the leading comprehensive cancer centre in Poland and a proud OECI member – to bring together the European oncology community in the very heart of Central Europe.

Warsaw, the city of Maria Skłodowska-Curie, embodies the spirit of resilience, innovation, and scientific discovery. Her legacy continues to inspire generations of researchers, clinicians, and innovators across the world. Hosting this year's Oncology Days in Warsaw now bears her name is both a tribute to her groundbreaking discoveries and a confirmation of our shared commitment to excellence in cancer care, research, and prevention.

The OECI Oncology Days 2026 will focus on two crucial themes: new technologies in primary and secondary prevention and national cancer networks. These topics reflect not only the strategic priorities of OECI but also the mission of our Institute – to translate scientific progress into real-world impact for patients. The sessions will showcase examples of European collaboration, from innovative digital prevention tools and genomics-driven screening to the creation of interconnected oncology networks ensuring quality, equity, and access to care.

Beyond the conference halls, we hope you will also take time to experience the unique atmosphere of Warsaw – a city rebuilt from the ashes, vibrant and forward-looking, where history meets modern science, and where determination turns vision into achievement.

We wish you an inspiring, collaborative, and memorable meeting – one that strengthens our shared mission to improve cancer care across Europe.

Iwona Ługowska
OECI President Elect

Beata Jagielska
Instytut Maria Skłodowska-Curie

The OECI Network

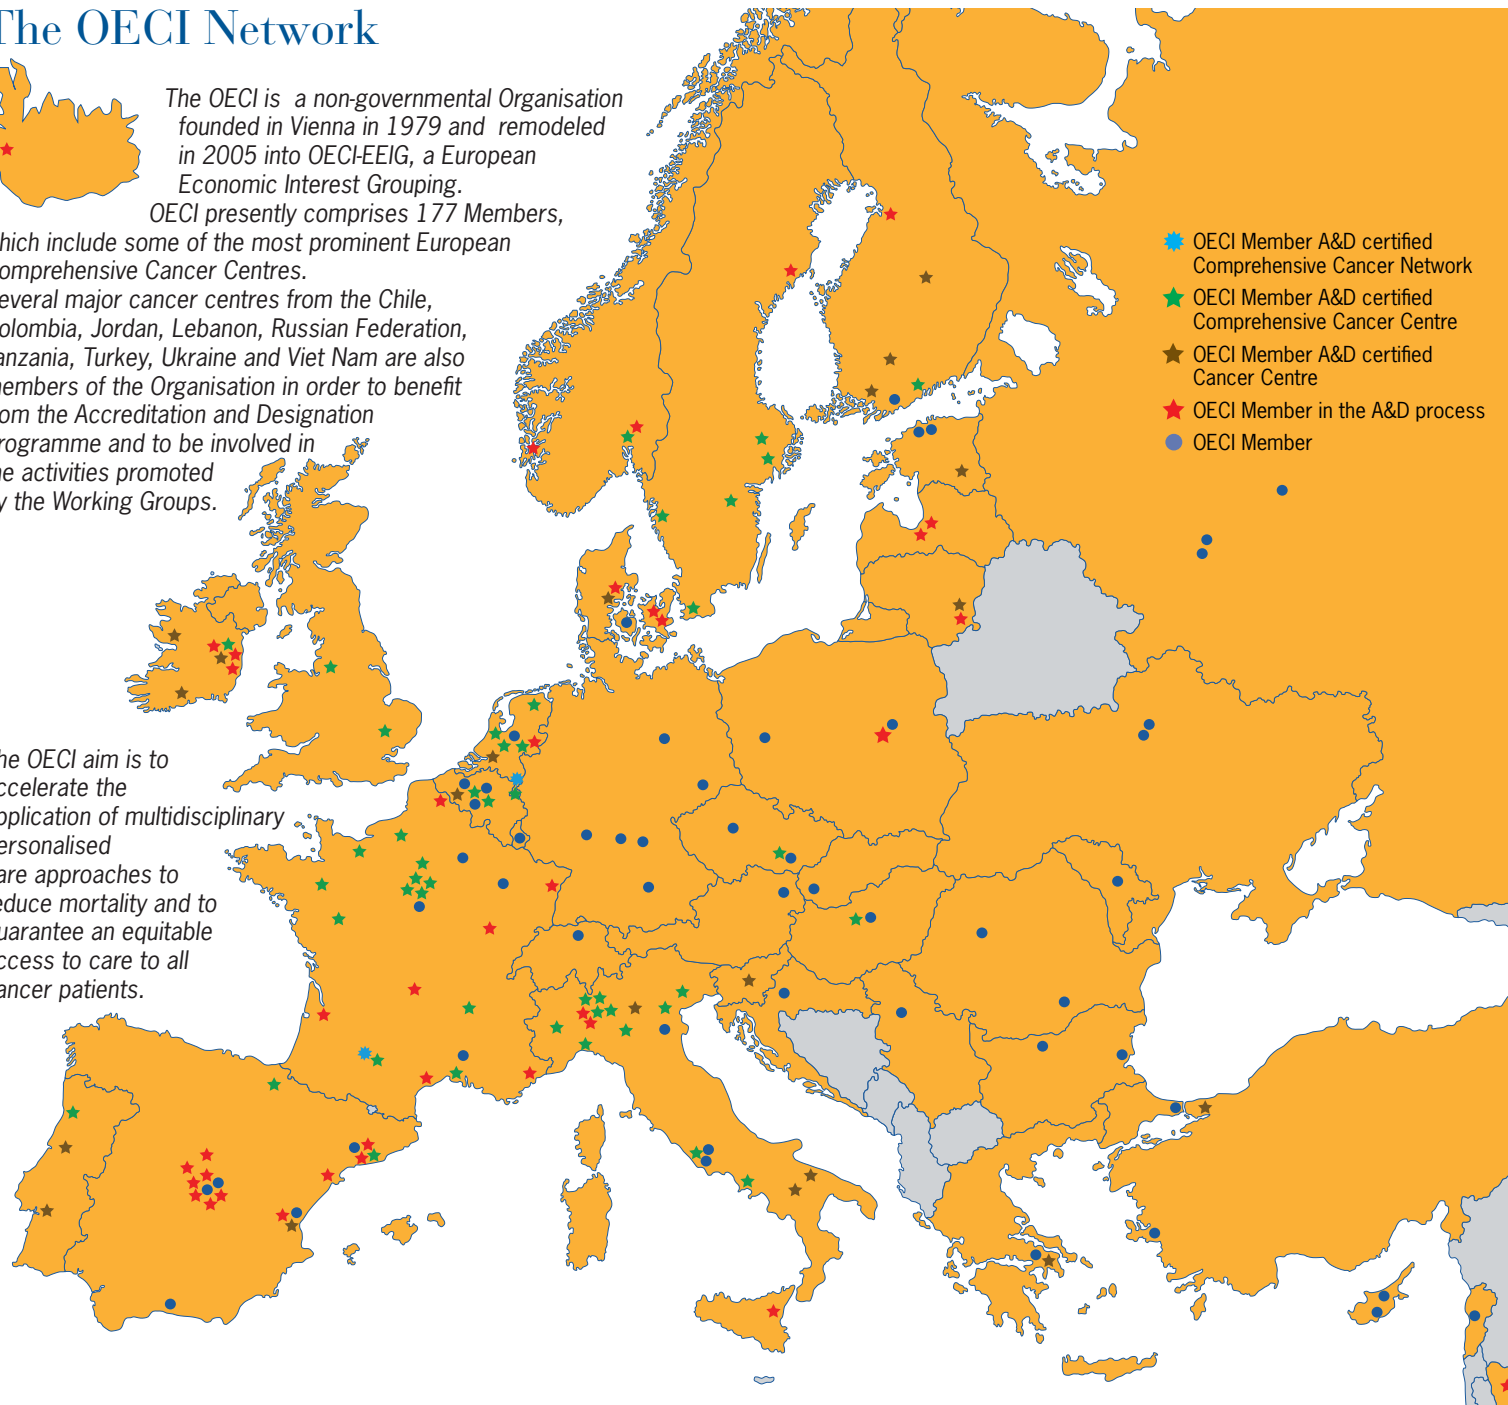

The OECI is a non-governmental Organisation founded in Vienna in 1979 and remodeled in 2005 into OECI-EEIG, a European Economic Interest Grouping.

OECI presently comprises 177 Members, which include some of the most prominent European Comprehensive Cancer Centres.

Several major cancer centres from the Chile, Colombia, Jordan, Lebanon, Russian Federation, Tanzania, Turkey, Ukraine and Viet Nam are also members of the Organisation in order to benefit from the Accreditation and Designation Programme and to be involved in the activities promoted by the Working Groups.

The OECI aim is to accelerate the application of multidisciplinary personalised care approaches to reduce mortality and to guarantee an equitable access to care to all cancer patients.

Narodowy Instytut Onkologii im. Marii Skłodowskiej-Curie Państwowy Instytut Badawczy

Maria Skłodowska-Curie National
Research Institute of Oncology

www.nio.gov.pl

The Maria Skłodowska-Curie National Research Institute of Oncology (MSCNIRO) is currently the largest oncology centre in Poland and one of the leading institutions in Central Europe, with its headquarters in Warsaw and branches in Kraków and Gliwice. In Warsaw alone, approximately half a million consultations are held annually. The Institute provides modern diagnostics, therapies, and comprehensive care, including nutritional, psychological, and rehabilitation support. Building on nearly 100 years of experience, the Institute conducts scientific research and over 500 clinical trials, including through the Early Phase Clinical Trials Unit, the Clinical Trials Support Centre, and the Centre of Excellence for Precision Oncology. Furthermore, the MSCNIRO coordinates the National Oncology Strategy, the implementation of the National Oncology Network, manages the National Cancer Registry, develops diagnostic and therapeutic guidelines, and promotes early cancer detection through screening programmes.

By virtue of the Act of 9 March 2023, the National Institute of Oncology in Warsaw also plays a key role in implementing the National Oncology Network, acting as the National Monitoring Centre. As part of this function, the Institute is responsible for drafting and updating diagnostic and treatment guidelines and organisational standards in oncology, analysing data on the application of key recommendations and the quality of oncological care, preparing proposals for changes to quality indicators, monitoring health programmes related to cancer prevention, providing training for oncology service providers, preparing

recommendations for the Minister of Health on health promotion and public education, and initiating actions for cancer prevention and control. Additionally, all three MSCNIRO branches act as Regional Monitoring Centres: MSCNIRO in Warsaw for the Mazovia Voivodeship, MSCNIRO in Kraków for the Lesser Poland Voivodeship, and MSCNIRO in Gliwice for the Silesian Voivodeship.

The National Institute of Oncology is also responsible for coordinating and monitoring the implementation of the National Oncology Strategy (NSO). As part of this task, the MSCNIRO team collaborates with the Ministry of Health and other ministries, providing substantive support to those carrying out the various tasks arising from the Strategy. It also works with the Department of Health Education and Promotion of the Ministry of Health in preparing promotional, educational, and informational materials, and undertakes international cooperation in areas related to oncology.

As a member of the European EURACAN network, MSCNIRO is a reference centre for the treatment of rare cancers. The Institute has also cooperated for many years with international organisations such as OECD, ESMO, EORTC, ESTRO, ASCO, and IARC, actively participating in shaping global oncology standards. The Institute's multidisciplinary teams of experts are also actively involved in primary and secondary prevention, including through the Cancer Prevention Centre, the Department of Epidemiology and Primary Cancer Prevention, and the Laboratory of Primary Prevention and Health Policy.

The founding of the Radium Institute on 29 May 1932 was the fulfilment of the greatest dream of the distinguished Pole, Maria Skłodowska-Curie. The Nobel laureate was personally involved in shaping the newly opened facility. Thanks to her efforts, the Institute was equipped with state-of-the-art radiotherapy equipment, and its operations were based on the latest scientific discoveries of the time. Her vision of combining research on radioactivity with its practical application in medicine became the foundation of the Institute's work and continues to guide us to this day. Drawing from its history, MSCNIRO is today an institution with a well-established position and reputation in the medical community. Our many years of experience, advanced research facilities, and qualified staff guarantee the highest quality of services for over half a million patients annually, striving for continuous development and the implementation of innovative solutions in oncological diagnostics and therapy.

Accreditation and Designation Session 1

Current developments and excellent practices from our accredited centres

In this session we give a brief overview of the state of play of the A&D programme, outlining the growth and development of the programme. We focus particularly on the accreditation of cancer networks which are an important growth area in Europe, in terms of cancer structures to deliver consistent high quality. We then continue with a selection of excellent practices from our accredited centres in areas of diagnosis and treatment. These have been specially selected by the A&D Board from strengths identified by audit teams from the accreditation process, and then documented with evidence of impact by the centres.

June 17

08.45 - 10.45

Accreditation and Designation Session 2

More excellent practices from our accredited centres

In this session we focus on a selection of excellent practices from our accredited centres. These have been specially selected by the A&D Board from strengths identified by audit teams from the accreditation process, and then documented with evidence of impact by the centres. These excellent practices are in all areas of the standards, from governance to patient empowerment, treatment to research, prevention to survivorship, early detection to education.

June 17

11.00 - 13.00

Cancer Economics WG Session

The session of the OECI Working Group on Health/Cancer Economics will be focusing on topics related to the new WG-strategy 2026-2028. This will for instance focus on input from OECI centers in to Real-World-Data based efficiency- and HTA studies.

We will present the results on a Delphi study on how to proceed in this field and a case study illuminating the importance.

Further two cases will clarify the opportunities of centers having a HTA unit within or close by their organisation in bringing relevant innovations swiftly to patients.

Lastly we foresee input from a renowned speaker on the status and consequences of geopolitical developments on costs and pricing of oncology medicines in the coming years.

June 17

14.00 - 16.00

OECI for Patients WG

Advancing meaningful Patient and Public Involvement (PPI) in global cancer care and research

The session aims at strengthening knowledge on how PPI can be effectively implemented in cancer care. It will present findings from a multi-centre qualitative study conducted in line with the OECI Accreditation and Designation Manual, specifically the chapter on patient involvement and empowerment. Drawing on the perspectives of PPI leads, the study explores how OECI centres understand, practice and promote PPI. Consequently, key enablers and barriers are identified.

Building on these findings, the session will include an interdisciplinary panel gathering cancer centre directors, PPI coordinators, clinicians, and patient representatives. The panel will reflect on the study results, share best practices, and discuss pathways for strengthening PPI implementation across the network.

By the end of the session participants will identify priority actions for advancing meaningful, equitable, and sustainable PPI within OECI centres.

June 17

14.00 - 16.00

Conference Room:

EUonQoL Session

June 17

16.30 - 18.30

This session will present the latest developments of the EUonQoL-kit Version 3, the innovative European toolkit designed to measure and monitor the Quality of Life (QoL) living with and beyond cancer. The discussion will focus on the alternative structures of the toolkit and their potential future applications across diverse clinical, research, and policy contexts. A key highlight will be the introduction of the new e-platform developed to enable spontaneous and real-time data collection through the EUonQoL-kit, creating opportunities for dynamic patient engagement and improved data integration across cancer centres and healthcare systems.

The session will also explore the implementation strategy for the EUonQoL-kit, including approaches to harmonisation, validation, and uptake within the OECI network and beyond. Special attention will be given to policy outreach and dissemination activities designed to ensure that EUonQoL outcomes inform European and national cancer policies, with the goal of improving patient-centred care practices.

Finally, the session will connect with the Quality of Life – Patient Centred Care (QoL-PCC) Cluster, highlighting collaborative initiatives aimed at aligning methodologies, sharing data, and promoting the use of QoL measures as a cornerstone of comprehensive cancer care. Through presentations and open discussion, this session will outline how EUonQoL is shaping the future of quality of life monitoring, research translation, and policy integration in the European cancer landscape.

Biobanking, Personalised Medicine and AI

Session to be confirmed

June 17

16.30 - 18.30

Scientific Conference

June 18

08.45 - 10.45

Session 1

New Technology on Precision Prevention

This session explores innovative, technology-driven approaches to primary and secondary prevention — from genomics and AI-assisted early detection to population-based HPV vaccination programs. Experts from leading OECI institutes will discuss how data, digital tools and precision prevention can reshape European cancer networks and policies.

Scientific Conference

June 18

11.00 - 13.00

Session 2

National Cancer Networks

This session brings together European leaders to present successful national oncology networks — from UNICANCER in France and the Dutch integrated care pathways to the Italian quality model, Swedish patient-centred coordination, and the emerging Polish network in the CEE region. The discussion will focus on collaboration, data sharing, and excellence frameworks shaping the future of cancer care in Europe.

OECI Young Network Session

At the first session at the OECI Oncology Days led by the Young Board, we will introduce our mission, ongoing initiatives, and our ambitions for the coming years. The focus will be on how junior professionals can actively participate and benefit from our activities across the network.

By emphasizing the value of collaborative activities, including twinning and research grant programmes, we aim to demonstrate how the Young Board can serve as a catalyst for both scientific/clinical career development and improved patient care. The session will include an interactive aspect, where participants are encouraged to share their needs, expectations, and ideas to build the next phase of our network, together.

Shaping the Future Together: The Young Board's Vision, Actions & Opportunities

Session organized by the Young Board

Chairpersons: Evy Lobbestael and Ilkka Liikanen

June 18

14.00 - 16.00

OECI A&D Auditors Session

This is a session restricted to auditors and A&D programme staff, and for those cancer centres interested in joining the A&D programme. In the session we will outline current developments in the A&D programme, issues in auditing, and what we can do to improve our processes and data flows.

June 18

14.00 - 16.00

CCI4EU Final Report and Expectations on Capacity Building Session CSA Session

CCI4EU (Comprehensive Cancer Infrastructures for the EU) concludes in April 2026. In this session we outline the successes and impacts of the 3-year action, and we describe the main interventions in capacity building and their impact: the Deep Dive consultancy interventions; the regional conferences; the online courses, and the observerships. We also describe the Maturity Model adopted, and the manner of evaluating impact through a Global Efficacy Score. We hear some feedback from the CCIs, and then outline the requirements to sustain the progress achieved in the Comprehensive Cancer Infrastructures.

June 18

16.30 - 17.30

OECI Participation in the 2026 and 2027 European Commission Calls

This session will outline the strategic approach and planned activities of OECI in relation to the 2026 and 2027 European Commission (EC) funding calls. It will present an overview of relevant Horizon Europe work programmes and other EU initiatives that align with OECI's mission to enhance cancer research, innovation, and care quality across Europe. The session will focus on identifying key thematic areas for participation, fostering collaborative opportunities among OECI members, and strengthening the network's engagement in EU-funded projects. Attendees will gain insights into proposal preparation processes, partnership building, and the mechanisms through which OECI can contribute to and benefit from the forthcoming EC calls, reinforcing its role as a leading actor in the European cancer research and care ecosystem.

June 18

17.30 - 18.30

Draft Agenda

08.00 **Registration**

08.15 **Opening**

General Assembly Constitution, welcome and approval of the Agenda
Giovanni Apolone

08.30 **Administrative Session**

Chairperson: Giovanni Apolone

Point 1: Approval of the General Assembly Minutes of 13 June 2025

(vote requested: decision to be taken by simple majority of the OECI Full Members present or represented)

Giovanni Apolone

Point 2: Approval of the Financial Statement 2025 and discharge to the Board

(vote requested: decision to be taken by simple majority of the OECI Full Members present or represented)

Diego Pazienza

Point 3: OECI 2025 Provisional Budget

(vote requested: decision to be taken by simple majority of the OECI Full Members present or represented)

Alfredo Budillon

Point 4: OECI Board composition for the coming years and renewal mandate for three Elected Members

(vote requested: decision to be taken by simple majority of the OECI Full Members present or represented)

Giovanni Apolone

Point 5: Hand-over of the 2023-2026 Presidency, and transfer of powers to the 2026-2029 Presidency

(vote not requested)

Giovanni Apolone and Iwona Ługowska

Point 6: New applications/resignation to the OECI membership, proposal of dismissals and requests of exemption from membership fee payment

(vote requested: for full membership and fee exemption - decision to be taken by unanimity of the OECI Full Members present or represented; for dismissal - decision to be taken by 2/3 of the OECI Full Members present or represented; for associate membership Type A-B-C - decision to be taken by simple majority of the OECI Full Members present or represented; no voting for membership withdrawals).

Chairpersons: Iwona Ługowska and Vice President

12.45 **Closure of the 2026 OECI General Assembly**

13.00 **Lunch**

Warsaw

Warsaw is a dynamic and fast-growing European capital. It is the political, economic and cultural centre of Poland. It is often referred to as the “Phoenix City” because it rose from near-total destruction during the II World War to become a major European centre of culture, science, and business.

June is one of the best months to visit Warsaw, as the city enjoys warm and pleasant weather. Average daytime temperatures range from 20°C to 24°, with longer daylight hours—up to 17 hours of light. Occasional rain showers can occur, but they are usually brief. Parks and river boulevards are in full bloom, and locals spend time outdoors enjoying the mild evenings. It's a perfect time for sightseeing, outdoor cafés, and festivals.

OECD 2025 Gala Dinner

June 18 - 20.00 Hrs

The Gala Dinner of Oncology Days 2026 will be hosted at the Kubicki Arcades in Warsaw, an elegant and historic venue forming part of the Royal Castle complex. Designed in the early 19th century by architect Jakub Kubicki, the arcades originally supported the castle gardens and have since been carefully restored to serve as a distinctive space for cultural and formal events. Situated at the foot of the Royal Castle, between the UNESCO-listed Old Town and the picturesque Vistula River escarpment, the Kubicki Arcades offer a unique combination of history, charm, and a welcoming atmosphere—an ideal setting for our special evening.

Hotels and logistics

The conference will take place in the very city center of Warsaw, with convenient access to hotels, public transport, and major attractions. We recommend booking flights to Warsaw Chopin Airport (WAW), which is the closest and most convenient airport for reaching the city center. From the airport, you can get to downtown Warsaw in several ways:

- Train (SKM or Koleje Mazowieckie) – Direct trains run from the airport to the Central Railway Station; the journey takes about 20–25 minutes.
- Bus – Several city bus lines connect the airport with central Warsaw; travel time is roughly 30 minutes depending on traffic.
- Taxi or Ride-hailing services (Bolt, Uber, FreeNow) – Taxis are available directly outside the terminal; the ride to the center typically takes 20–30 minutes.

THE OEI 2026 INTERNATIONAL SCIENTIFIC COMMITTEE

Presidents

Giovanni Apolone and Iwona Lugowska

Members

Rebecca Amet , Giovanni Apolone, Sławomir Blamek, Christian Brandts, Jean-Benoît Burrión, Alfredo Budillon, Maja Cemažar, Cinzia Brunelli, Olli Carpén, Steven le Gouill, Vince Kornél Grolmusz, Beata Jagielska, Claudio Lombardo, Iwona Lugowska, Mef Nilbert, Delia Nicoara, Simon Oberst, Júlio Manuel Ramos Maiade Oliveira, Thierry Philip, Janusz Ryś, Per Anders Sandström, Jacqueline M.L. Stouthard, Josep Tabernero Caturla, Wim H. van Harten
