

## **Jean-Benoît Burrion**

Jean-Benoît Burrion is M.D. He holds the position of Deputy Medical Director and heads the Prevention and Screening Clinic at the Jules Bordet Institute. He earned his medical degrees at ULB (Brussels), has a degree in tropical medicine (Institute of Tropical Medicine, Antwerp), in occupational health and industrial toxicology (UCL, Brussels), and in hospital management (ULB, Brussels).

He worked for 20 years as a medical doctor and a program manager on crisis conditions and health development issues in low income countries, before definitively turning to cancer care and prevention.

Since 2008, he is involved in cancer prevention and screening. Activities and projects encompass risk stratification based approach of population screening, multi partnership pilot screening programs, personalized screening clinic management, environmental health issues ... He coordinates the international multicentric My PeBS study in Belgium. He is a lecturer in cancer epidemiology and statistics at the nursing ULB school (HELB).

He set up the Quality Department at Institut Jules Bordet. He has been committed to the Organisation of European Cancer Institutes (OECI) for more than 10 years and took an active part in the development of the OECI A&D Programme. He is member of the Board since 2017.
